Studio B

Drive in modular studio with an industrial flair

Studio B, is well known for its "8thstreet Concrete" and modularity. A blank canvas with personality, that can be used as a space to build sets, or for its elegant architectural shapes and materials in your visual compositions. Studio B houses a fully functional open kitchen, which also makes it a great choice for food photography.

it's modularity makes it possible for it to be used in numerous ways, modularity we have to emphasize, without compromise in facilities. Everything is movable even our real fig tree is on wheels. The makeup and styling area can be moved or eliminated to help accommodate different setup requirements.
